

Cisbio KinEASE

Validated kinases and assay conditions

The general assay conditions used for the validation of the kinases are: Kinase 10 ng/well, ATP 100 µM, Substrate 1µM and the optimized kinase buffer with or without SEB (Supplement Enzymatic Buffer) at 50 nM. Biotin/Streptavidin ratio is 8/1. We recommend for each enzyme to perform a step by step optimization as described in the package insert.

| KINASE | SYNONYM | KINEASE KIT | KINASE ENZYMATIC BUFFER 1X SUPPLEMENTED WITH: |
|---------------|----------------|-------------|---|
| ABL1 | | TK | 5 mM MgCl ₂ , 1 mM DTT, SEB |
| ABL2 | Arg | TK | 5 mM MgCl ₂ , 1 mM DTT, SEB |
